

FILE NO: [REDACTED] - [REDACTED]  
SUBJECT: RECENT DEVELOPMENTS IN THE  
WHEREABOUTS OF THE [REDACTED] DEVICES

Over the years the Bureau of Really Large Data Analysis (BRLDA) has intercepted multiple credible signals suggesting the existence of three [REDACTED] data analysis devices (see [REDACTED], Section 18f). Since first learning of their existence, the Bureau has been engaged in a covert operation spanning several years to track and secure the whereabouts of the artifacts. Numerous unconfirmed sightings and fleeting evidence of these devices have been reported in various locations worldwide, escalating their elusive and enigmatic status.

The [REDACTED] has been the subject of [REDACTED] separate sightings over the past decade, primarily across locations in [REDACTED] and [REDACTED]. Despite these reports, BRLDA field operatives have until recently been unsuccessful in verifying its existence or pinpointing its exact whereabouts.

[REDACTED] has been the most elusive of all three devices, with only a handful of unconfirmed sightings across [REDACTED] and [REDACTED], resulting in [REDACTED] leads that have been challenging to corroborate.

### Recent Developments

As of [REDACTED]-2023, BRLDA field operatives have successfully secured all three artifacts in a major operation that [REDACTED]. The devices are now under BRLDA control, specifically in the hands of officers stationed at a [REDACTED] safe house.

Due to the sensitive nature of the operation and the potential implications of these devices, details regarding the exact location of the safe house, identity of the officers, and the precise manner in which the artifacts were secured are not documented.

BRLDA personnel are reminded to maintain strict operational security. Any relevant sightings or intel regarding these artifacts should be reported immediately to [REDACTED].
